Thanks, Stan. Just to clarify, the document I have been asked to review is likely a relatively short response to a parent question received on a kids safety website (run by TERA), and not a full risk assessment.

Hi Ed and Phil

NSF has been receiving inquiries about the chemical spill from consumers, media and others.

We are not sure about getting involved, but we were wondering if we do get involved, what you might recommend as the most useful role.

Is EPA involved?

Amanda has been asked to quickly peer review a risk assessment of the chemical.

Just thought we should check in with you.

Thanks
